

CSIS 1595 Project 1

Wheel of Fortune

For this project you are to create a “Wheel of Fortune” game.

The features of the game are:

- a game maker inputs a word that the 3 other contestants have to then guess
- contestants take turns
- contestant is given a menu to choose from
 - buy a vowel (cost \$250 and deducted from players score) if they can't afford it they are not allowed to buy one (if there are multiple vowels the \$250 is a multiplier)
 - spin the wheel where the dollar values are random dollar amounts from \$100 - \$3000 (all amounts are divisible by 100)
 - if there are multiple letters the amount is a multiplier
 - solve the puzzle

There is no need for a bonus round

Have fun and upload on blackboard when finished. You will be given lab days to complete

Due Date: Oct 1, 2019 11am
